*Safari Tents*

USD PRICING | **JUNE 2025**

**The Safari Tent is changing the glamping landscape with a smart solution that delivers the ultimate versatility and durability to your site - allowing you to maximise your yearly returns.**

#### **FAST INSTALLATION**

Installation takes on average 8 hours with Eco Structures providing an extensive installation guide.

#### **FAST ROI**

Ability to charge high nightly rate for a fast return on investment.

#### **NO APPROVALS REQUIRED**

The Safari Tent thrives in remote locations where permanent tents aren't required, offering a quick accommodation solution that treats guests to a high level of comfort.

#### **ECO FRIENDLY**

Our Safari Tents reduce carbon footprint through the flat pack freightable design and they leave minimal impact on the ground.

Pine

# Worldwide Shipping

## SHIPPING IS COST +10%

Shipping is a cost-recoverable process, and our goal is always to secure the most competitive rates for our customers.

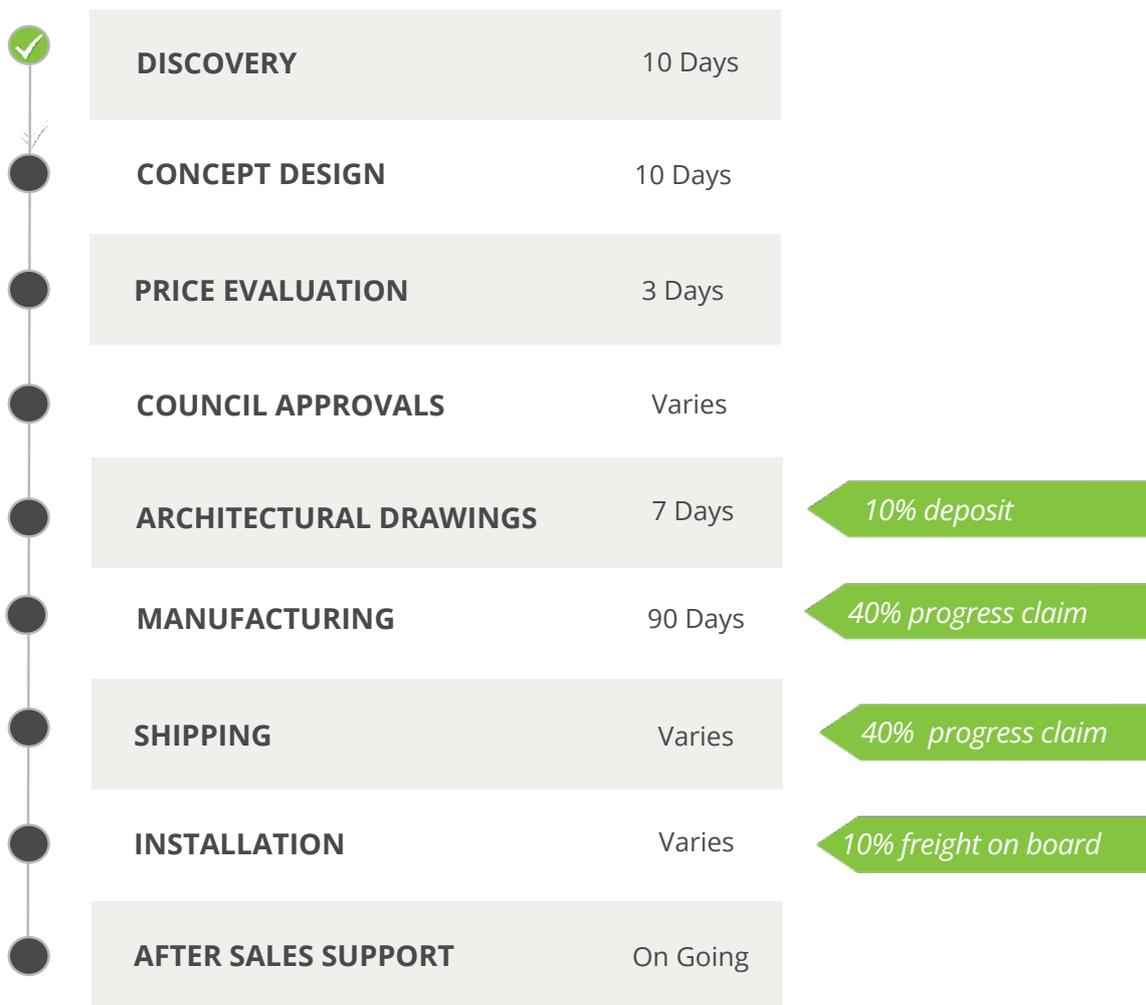

A single 40ft High Cube container can accommodate up to 12 Safari Tents, making bulk orders highly efficient to ship.

Eco Structures works with trusted freight forwarders and customs brokers to secure competitive rates across ocean, air, and land freight. Once your order arrives at port, you can either make your own arrangements to transport it to site or opt for our end-to-end delivery service—available at an additional cost.

# Next Steps

The above timeline is based on a typical Eco Structures project. Actual timelines may vary depending on project complexity, local regulations, and other factors.

As each custom packing and shipping request is unique, so too is each estimate. Freight estimates are not guaranteed until 30 – 45 days prior to delivery and may vary based on confirmed weight, dimensions, date, and other pertinent information.

# Frequently Asked

## LEAD TIME

90-120 days to manufacture  
4 weeks shipping  
1 day to install

## STRUCTURAL SYSTEM

Hot dipped galvanised structural steel frame, with 15 Years Warranty.

## CARE & MAINTENANCE

The maintenance required for Safari Tents is minimal. Store bought products can be used to clean any marks.

## REPLACEMENT PARTS

We offer replacement canvas panels, decking and roof flys for when there is a need. Just remove the current panel or part and replace with a new panel.

## HEATING & COOLING

Safari Tents can be heated or cooled with split system air-conditioning, or a fireplace for the cooler climates.

## WIND & FIRE RATINGS

Safari Tents are rated to 100km/hr winds. When winds are expected to be higher than this, it is advised to dismantle the Safari Tents as warranty is removed.

## BED SIZE

A double or queen sized bed can fit perfectly. The Distance from the back wall to the pole is 2200mm (90.5in)

## GROUND CONDITIONS

The site chosen for install must be a level site. Each footing at the base has 100mm/ 3.9in of adjustment in the event of a slightly unlevel site.
