SPECIFICATIONS & ROI | **JUNE 2025**

Eco Tourism & Beyond

While each client is unique, what unites the people who choose to work with us, is their forward-thinking nature and the importance they place on the environment.

Our clients' minds are not focused on where travelers went yesterday – they're busy creating where experience-seekers will be heading tomorrow. Here, we've taken a moment to stop and celebrate their success and reflect on their journey with us.

Inside, you'll find a series of project summaries outlining the tent types used—ranging from our Pop-Up Tent to the 4.2m, 5m, and 6.3m models—alongside base purchase details, return on investment insights, and colour selections.

Each project reflects a shared commitment to quality, speed, and sustainability. Our clients choose Eco Structures because our solutions are engineered to perform in remote and remarkable locations—built stronger, installed faster, and delivering measurable returns.

We're proud to play a role in these outcomes and excited to continue supporting operators redefining the future of eco-tourism.
