*Rapid Tents*

USD PRICING | **JANUARY 2026**

# Rapid Tents

*Rapid, non-permanent glamping tents designed for fast deployment.*

## FAST INSTALLATION

Rapid Tents can be installed in hours, not months, enabling operators to start earning almost immediately. Faster activation means quicker cashflow, reduced downtime, and the ability to capitalise on peak seasons.

## MOVEABLE ASSETS

Unlike fixed buildings, Rapid Tents are fully relocatable. If demand shifts, opportunities arise elsewhere, or land use changes, the entire investment can be moved, expanded, or repositioned.

## NO APPROVALS REQUIRED

Rapid Tents are classed as temporary structures allowing them to bypass lengthy planning approvals. This significantly reduces project risk, accelerates market entry, and lowers the administrative burden.

## LOW IMPACT

Rapid Tents are designed to protect the natural landscape with minimal disturbance. This enhances market appeal, attracts eco-minded travellers, and future-proofs your investment against tightening environmental standards.
